## PROFESSIONAL SUMMARY

Full-stack engineer with 15+ years building and owning AI-adjacent products, automation platforms, and enterprise-grade web systems end-to-end -- from architecture through deployment and production support. Shipped a 12-module BNPL platform processing **100B+ IRR/year** in live transactions (Next.js 14 frontend, PostgreSQL/MySQL, Redis queues, Docker). Extended three open-source TypeScript/Node.js platforms (Dub.co -- Prisma/Next.js; Twenty CRM -- Node.js/GraphQL; Umami -- Next.js/PostgreSQL) in production with custom modules, GraphQL API extensions, and multi-tenant dashboards. Migrated **25+ enterprise applications to AWS** across Southeast Asia during 3 years at Amazon Web Services Singapore -- hands-on Linux, Docker, nginx, and deployment workflows at scale. Active AI development stack: Claude AI (Anthropic), GitHub Copilot, Cursor IDE -- daily use on architecture decisions, refactoring, and code review. Led engineering teams of up to 14 and delivered for US, UK, and Southeast Asia clients remotely.

## CORE COMPETENCIES

|                                  |                           |                                          |                                   |                  |
|----------------------------------|---------------------------|------------------------------------------|-----------------------------------|------------------|
| TypeScript / JavaScript (ES2024) | Next.js 14 / React        | Node.js / Bun                            | PostgreSQL / MySQL / MongoDB      | Prisma / TypeORM |
| Docker / Linux / nginx           | REST API Design / GraphQL | AI/LLM Integrations (Anthropic / OpenAI) | Full Product Ownership            |                  |
| AWS (EC2 / S3 / RDS / Lambda)    | CI/CD Pipelines           | Tech Leadership (up to 14 engineers)     | Remote Delivery (US / UK clients) |                  |

## TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript (ES2024), PHP 8, SQL    **Frontend:** Next.js 14, React, Vue.js 3, Vite, Tailwind CSS

**Backend / Runtime:** Node.js, Bun, Express, Hono (learning), PHP/Laravel

**ORM / DB:** Prisma, TypeORM, PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch

**AI / LLM Stack:** Anthropic Claude API, OpenAI SDK, GitHub Copilot, Cursor IDE, MCP tooling, prompt engineering

**Infrastructure:** Docker, Linux (server admin), nginx, systemd, AWS (EC2/S3/RDS/Lambda), GitLab CI/CD

**Architecture:** Modular monolith, microservices, multi-tenant SaaS, Porto SAP, REST / GraphQL

**Workflow:** Git, GitHub, Jira, Notion, Figma, async remote delivery

## WORK EXPERIENCE

**Sinapse** Jan 2025 -- Apr 2025

**Back-End Developer -- AI Health Platform | Middle East**

- Re-architected backend of a live **AI-powered health platform** -- separated business domains into modular containers (Porto SAP), enabling the AI/ML team to consume clean API contracts for predictive features.
- Exposed structured API endpoints for LLM and ML model integration; reduced critical API response times through query optimization, Redis caching, and service decomposition with zero downtime during live refactor.
- Used **Claude AI** and **GitHub Copilot** as force multipliers to deliver a full architecture rewrite under tight deadline -- AI-assisted coupling detection, automated refactoring suggestions, inline code review.

**Tandis Mandegar Pardis (Shahr-e-Aghsat)** Apr 2024 -- Apr 2025

**Full-Stack Developer | Middle East**

- Architected and shipped a 12-module platform from scratch -- wallet system, loan management, installment scheduler, credit scoring, order management, admin dashboard -- now processing **100B+ IRR/year** in live transactions.
- Next.js 14** admin frontend; **PostgreSQL + Redis** backend; async queue workers cut notification latency from 30s to under 2s; idempotent payment gateway integration with zero failures over 6 months.
- Owned the full lifecycle: architecture decisions, database design, API contracts, deployment on Docker + nginx, production monitoring and incident response.

## Innoghte (Remote -- USA)

Apr 2023 -- Nov 2023

### Senior Full-Stack Developer | Remote

- Delivered full-stack migration (WordPress to modern React stack) for a US-based e-learning platform -- zero downtime, phased rollout with feature flags, ~60% page load improvement post-migration.
- Rebuilt course management, user progress tracking, subscription system, and content delivery from scratch on a clean relational schema. Async English-language collaboration throughout.

## Amargaran Tafakkor Ideal (IranSampler)

Aug 2022 -- May 2023

### Team Lead & Senior Developer | Middle East

- Led a **14-person engineering team** -- sprint planning, code reviews, architecture decisions, mentoring. Delivered a multi-tenant SaaS survey platform serving 50+ enterprise clients.
- Built dynamic form builder with conditional logic, per-tenant schema isolation, RBAC, and a real-time analytics dashboard with API layer for third-party integrations.

## Amazon Web Services

Nov 2015 -- Sep 2018

### Senior Developer (Cloud Infrastructure) | Singapore

- Migrated **25+ enterprise applications** from on-premise to AWS across Southeast Asia -- maintained 99.9% SLA during live migration windows. Hands-on Linux server administration, Docker, nginx, and deployment workflows at enterprise scale.
- Designed cloud security and resilience architectures: VPC, IAM, multi-AZ RDS, Auto Scaling, SQS, ElastiCache. Onboarded 20+ enterprise organizations.

## Cloud Computing Business Innovation Sdn. Bhd.

2010 -- 2019

### Senior Developer & CEO (Co-Founder) | Malaysia

- Co-founded and led an **MSC-status IT company** in Malaysia -- up to 14 engineers, government agency and university clients. Delivered enterprise software: web accounting platform (ZAR), HR management systems, multi-tenant client portals.
- Named **Top Web Developer Southeast Asia 2019**.

## KEY PROJECTS & OPEN SOURCE

### Twenty CRM Node.js / GraphQL / TypeScript

Self-hosted open-source CRM ([github.com/twentyhq/twenty](https://github.com/twentyhq/twenty)). Extended **GraphQL API** for bulk lead imports with linked task creation. Configured OpenResty reverse proxy with SSL. Built custom lead pipeline flows. Full-stack TypeScript/Node.js production deployment.

Node.js | GraphQL | React | PostgreSQL | OpenResty | Docker

### Dub.co Next.js / Prisma / TypeScript

Self-hosted open-source link attribution platform ([github.com/dubinc/dub](https://github.com/dubinc/dub)). Extended **Prisma ORM** schema for campaign tracking across e-commerce funnels. Integrated with platform analytics pipelines and customized link metadata for regional targeting.

Next.js | Prisma | PostgreSQL | TypeScript

### Shahr-e-Aghsat BNPL Platform Full product ownership

12-module Buy Now Pay Later system -- wallet, installment scheduler, credit scoring, order management, admin dashboard. Processing 100B+ IRR/year in live transactions. Redis async queues, idempotent gateway integration, zero payment failures over 6 months.

Next.js 14 | MySQL | Redis | Docker | nginx | Porto SAP

### Umami Analytics Next.js / PostgreSQL

Self-hosted privacy-focused analytics ([github.com/umami-software/umami](https://github.com/umami-software/umami)). Extended with custom event tracking modules, multi-tenant dashboard support, and RTL layout. Integrated as analytics backbone for e-commerce and BNPL platforms.

Next.js | PostgreSQL | multi-tenant | Docker

## EDUCATION

### M.Sc. Software Engineering -- Staffordshire University, UK

2011 -- 2013

GPA: 17/20 | Thesis: Cloud-based distributed systems architecture

### B.Sc. Computer Hardware Engineering -- Azad University, Tehran

2005 -- 2010

GPA: 16/20
