PROFESSIONAL SUMMARY

Technology executive and co-founder with 15+ years of engineering depth and 9+ years building and leading technical teams of up to 14 engineers. Founded and ran an MSC-status technology company in Malaysia — owning the full CTO mandate: technology strategy, platform architecture, infrastructure selection, team recruitment, mentoring, and KPI-driven delivery. Shipped products from idea to market across fintech, BNPL, health tech, HR, and accounting domains. Proficient in **Swift (iOS / Xcode)** and **Kotlin (Android / Android Studio)** for native mobile development, alongside **C# / ASP.NET Core** and **Node.js** for backend systems. Deep experience in cloud infrastructure (AWS), Agile/Scrum/Kanban team structures, and cross-platform API design for mobile clients. M.Sc. Software Engineering, Staffordshire University (UK).

CORE COMPETENCIES

Technology Strategy & Roadmap

Swift / Xcode (Advanced)

Kotlin / Android Studio (Advanced)

C# / ASP.NET Core (Advanced)

Node.js & Backend Architecture

Team Building & Technical Mentoring

Agile / Scrum / Kanban

Cloud & DevOps (AWS · Docker · Kubernetes)

Mobile API Design & Integration

Product Delivery — Idea to Market

WORK EXPERIENCE

Cloud Computing Business Innovation Sdn. Bhd. 2010 – 2019

Co-Founder & Chief Technology Officer Malaysia (MSC-Status Company)

- Owned the full CTO mandate: **technology strategy**, platform architecture, infrastructure selection, and framework decisions across all product lines.
- Built, recruited, and led a technical team of up to **14 engineers** — hiring, onboarding, mentoring, and performance KPIs for each team member.
- Established **Agile/Scrum delivery processes**, sprint cadences, code review standards, and team structures across multiple concurrent product lines.
- Delivered products from idea to market: **ZAR** (web accounting platform), HR management system with Malaysian payroll compliance, multi-tenant client portals, and enterprise automation software.
- Technology decisions: C# / ASP.NET, .NET Framework, MySQL, cloud infrastructure — evaluated and selected all vendors and frameworks.
- Clients: government agencies, universities, and private enterprises across Malaysia. Obtained **MSC-Status certification**.

Sinapse Jan 2025 – Apr 2025

Back-End Architect Middle East

- Led architecture decisions for an AI-powered health and preventive medicine platform: selected Porto SAP (Containers/Ship) to cleanly separate business logic from the framework layer.
- Designed and documented the **mobile API layer** consumed by iOS and Android clients — defined RESTful contracts, versioning strategy, and health data payload schemas.
- Built a **real-time push notification pipeline** for personalized health alerts and appointment reminders, integrated with APNs (Apple Push Notification service) and FCM (Firebase Cloud Messaging).
- Implemented device token management and per-user notification preferences across iOS and Android channels, ensuring delivery reliability at scale.
- Reduced critical API response times through targeted query optimization, caching strategies (Redis), and service decomposition.
- Collaborated with the AI/ML team to expose structured API contracts for predictive health features consumed by mobile clients.

Upwork — Freelance Mobile Developer

2021 – 2024

iOS & Android Developer (Swift / Kotlin) Remote — International Clients

- Developed native iOS app in **Swift / Xcode** and Android app in **Kotlin / Android Studio** for a funeral service arrangement platform — full product ownership from design to App Store / Google Play submission.
- Built core features: service catalog and booking flow, accessories selection with real-time inventory, scheduling and appointment management, and payment gateway integration.
- Designed the REST API backend consumed by both mobile clients; implemented push notification delivery (APNs + FCM) for booking confirmations and status updates.
- Delivered the full cross-platform suite independently, coordinating directly with the client across time zones — shipped on time with 5-star Upwork rating.

Amargaran Tafakkor Ideal (IranSampler)

Aug 2022 – May 2023

Team Lead & Senior Developer Middle East

- Led the development team using **Agile/Scrum**: sprint planning, code reviews, technical roadmap, and developer mentoring.
- Defined **KPIs for the development team** and established code quality standards and delivery benchmarks.
- Architected a multi-tenant data model and dynamic form builder engine for a professional survey SaaS platform.

Donya-e-Eqtesad Media Group

May 2023 – Apr 2024

.NET Developer Middle East

- Maintained and extended 7 core internal systems in **C# / ASP.NET Core** using **Microsoft Visual Studio** for one of the region's largest financial media organizations.
- Designed and built an internal news monitoring platform for real-time content tracking across multiple sources.

Amazon Web Services

Nov 2015 – Sep 2018

Senior Developer — Cloud Infrastructure Singapore

- Designed cloud security, scalability, and resilience architectures for **25+ enterprise application migrations** across Southeast Asia.
- Made infrastructure and service selection decisions for 20+ client organizations; technical authority on cloud onboarding across Singapore, Malaysia, and Vietnam.

Microsoft Research Center

2011 – 2014

Backend Software Engineer Technology Park, Malaysia

- Developed and localized **C# / .NET** software modules (banking, tax) using **Microsoft Visual Studio** at Microsoft's regional research and commercial center.
- Collaborated with cross-functional teams on infrastructure, deployment, and backend integration tasks.

Tandis Mandegar Pardis (Shahr-e-Aghsat)

Apr 2024 – Apr 2025

Full-Stack Developer & Platform Architect Middle East

- Architected and delivered a full BNPL/installment platform from greenfield to production: 12 modules, live payment gateway, wallet system — now processing **10B+ IRR/year**.
- Made all technology selections: Laravel + Next.js, Porto Architecture, BehPardakht/Mellat Bank gateway.

KEY PRODUCTS DELIVERED

Funeral Arrangement & Accessories Mobile App Upwork / Freelance

Native iOS (Swift / Xcode) and Android (Kotlin / Android Studio) apps for full-service funeral arrangement and accessories management. Features: service catalog, accessories booking, scheduling, real-time availability, push notification delivery (APNs + FCM), and payment integration. Submitted to both App Store and Google Play.
Swift · Xcode · Kotlin · Android Studio · REST API · APNs · FCM · 2021-2024

CCBI Malaysia — Enterprise Product Portfolio CTO / Co-Founder

ZAR web accounting platform, HR management system (Malaysian payroll & tax compliance), multi-tenant client portals, and enterprise automation software. Delivered for government agencies, universities, and private enterprises. Led a 14-engineer team across all products from strategy to production.
C# · ASP.NET · .NET Framework · MySQL · Microsoft Visual Studio · 2010-2019

Shahr-e-Aghsat — BNPL E-Commerce Platform shahr-aghsat.com

12-module BNPL installment platform built solo — concept to market. Wallet system, loan management, credit scoring, live BehPardakht/Mellat Bank gateway. Processes 10B+ IRR annually.
Laravel · Next.js · Porto Architecture · MySQL · Redis

IranSampler — Professional Survey SaaS iransampler.com

Multi-tenant survey and questionnaire platform. Team lead: Agile/Scrum delivery, KPI tracking, code reviews, and dynamic form builder architecture.
Laravel · Vue.js · Multi-tenant architecture

EDUCATION

M.Sc. Software Engineering — Staffordshire University, United Kingdom	2011-2013
GPA 17/20 · Thesis: Cloud-based distributed systems architecture	
B.Sc. Computer Hardware Engineering — Azad University, Tehran	2005-2010
GPA 16/20	

CERTIFICATIONS & RECOGNITION

Top Web Developer — Southeast Asia	2019
MSC-Status Company Certification — Malaysia (Cloud Computing Business Innovation)	2010
IELTS Band 7.0 — English Proficiency (C1+)	—
Porto Architecture Practitioner — Applied in production at Sinapse and Shahr-e-Aghsat	—

SKILLS

Leadership: Technology Strategy, Team Building (14 engineers), Agile/Scrum/Kanban, KPI Definition, Technical Mentoring, Recruitment
Mobile (Advanced): Swift, Xcode, Kotlin, Android Studio, APNs, FCM, App Store / Google Play deployment
Specialized (Advanced): C# / ASP.NET Core, Microsoft Visual Studio, Node.js
Backend: PHP 8.x / Laravel, REST API, GraphQL, Porto Architecture, Clean Architecture, DDD
Architecture: Microservices, Modular Monolith, SOA, Multi-tenant SaaS, Mobile API Design
Cloud & DevOps: AWS (EC2, S3, RDS, Lambda), Docker, Kubernetes, GitLab CI/CD, Linux, Nginx
Databases: MySQL, PostgreSQL, Redis, Elasticsearch, MongoDB
Security: Keycloak SSO, SSL/TLS, OAuth2, Role-Based Access Control
Languages: English (C1+ / IELTS 7.0), Persian (Native), Malay (Conversational)
