

Soroush Gholami

Senior Full-Stack Engineer · Fintech & Digital Banking · Payment Systems · Cloud Infrastructure

+905059399702 | soroush2025@gmail.com | linkedin.com/in/soroushgholami

Middle East · Open to Relocation - Gulf / Levant / Turkey

PROFESSIONAL SUMMARY

Senior Full-Stack & Fintech Engineer with 15+ years building payment processing systems, digital lending platforms, and cloud-native financial infrastructure across the Middle East and Southeast Asia. Architect of a live BNPL platform (*Shahr-e-Aghsat*) processing **100B+ IRR annually** - encompassing digital wallet systems, credit scoring engines, loan origination workflows, and idempotent payment gateway integration with **zero reconciliation failures** over six months of live operation. Former Amazon Web Services engineer (Singapore) with hands-on cloud architecture across 25+ enterprise migrations. Expert in designing transaction-grade backend systems where financial data integrity, real-time processing reliability, and audit-trail completeness are non-negotiable. Specialized in Laravel, PHP, React/Next.js, and AWS - actively targeting senior engineering roles at digital banks, neo-banks, and fintech platforms across the Middle East.

CORE COMPETENCIES

Payment Gateway Integration

BNPL & Digital Lending

Digital Wallet Architecture

Credit Scoring & Loan Origination

Transaction Reconciliation & Idempotency

Cloud Infrastructure (AWS)

Porto / DDD Modular Architecture

Real-time Financial API Design

WORK EXPERIENCE

Tandis Mandegar Pardis - Shahr-e-Aghsat Platform Apr 2024 - Apr 2025

Full-Stack Engineer · BNPL & Digital Lending

Middle East (Remote)

- Architected and delivered a full BNPL / installment purchasing platform from greenfield to production - **sole architect across 12 independent domain modules**, now processing **100B+ IRR in annual live transactions**.
- Built **digital wallet system** with credit allocation, balance management, real-time transaction history, and fund reconciliation.
- Designed **credit scoring engine** with rule-based loan origination, multi-tier approval workflows, and manual override controls for risk management.
- Integrated **BehPardakht / Mellat Bank payment gateway** with idempotent transaction design, webhook signature validation, and full reconciliation - zero failed payments over six months of live operation.
- Implemented **Redis-queued async installment scheduler** - automated payment reminders and plan enforcement, reducing notification latency from 30s to under 2s.
- Applied **Porto SAP architecture** (Containers/Ship pattern) across all 12 domain modules (Wallet, Loans, Installments, Gateway, Orders, Users, Admin) - enforcing zero cross-domain coupling.
- Built **Next.js admin dashboard** with real-time financial reporting, fraud flagging interface, and transaction monitoring.

Sinapse Jan 2025 - Apr 2025

Back-End Developer · Platform Architecture

Middle East

- Re-architected Laravel backend of an AI-powered health platform using **Porto SAP** - separated business logic into domain Containers and Ship framework core.
- Restructured codebase into Porto's Actions, Tasks, and Repositories layers - reduced service coupling and improved testability across all domain contracts.
- Applied **financial-grade API idempotency patterns** to health data endpoints to support reliable AI/ML integration under concurrent load.
- Leveraged Claude AI and LLM-assisted workflows to deliver a full Porto re-architecture under a tight production deadline.

Donya-e-Eqtesad Media Group

May 2023 - Apr 2024

.NET Developer · Financial Systems

Middle East

- Maintained and enhanced backend systems for one of the **MENA region's largest financial media organizations**, covering capital markets, banking, and economic news.
- Built an internal **real-time financial news monitoring platform** aggregating content from multiple market data sources for editorial and institutional use.
- Improved system stability and performance across 7 core editorial and publishing systems through code refactoring and infrastructure upgrades.

Amargaran Tafakkor Ideal - IranSampler

Aug 2022 - May 2023

Team Lead & Senior Developer

Middle East

- Led development of **IranSampler**, a multi-tenant B2B SaaS survey platform - managed a **14-person engineering team** through architecture decisions, code reviews, and sprint planning.
- Architected **per-tenant data isolation model** and dynamic form builder engine with conditional logic - comparable to PorsLine / Typeform.

Innoghte

Apr 2023 - Nov 2023

Senior PHP & React Developer · Remote

Remote (USA-based client)

- Led full migration from WordPress to **Laravel + React** - rebuilt course management, subscription flows, and payment integration with zero downtime.
- Remote delivery for US client - async English-language technical collaboration across timezones.

Amazon Web Services

Nov 2015 - Sep 2018

Senior Developer · Cloud Infrastructure

Singapore

- Migrated **25+ enterprise applications** from on-premise to AWS across Malaysia, Singapore, and Vietnam - maintaining **99.9% SLA** during live migration windows.
- Designed cloud security architectures: **VPC segmentation, IAM policies, multi-AZ RDS, Auto Scaling groups**, encryption at rest and in transit.
- Onboarded 20+ enterprise client organizations to AWS - architecture reviews, production readiness assessments, and technical onboarding documentation.

Cloud Computing Business Innovation Sdn. Bhd.

2010 - 2019

Co-Founder & Senior Software Developer (CEO)

Malaysia (MSC-Status Certified Company)

- Co-founded and led an **MSC-status IT company** in Malaysia - up to 14 engineers, clients including government agencies, universities, and private enterprises.
- Built **ZAR**, a web-based accounting platform with financial reporting, multi-entity chart of accounts, payroll compliance, and Malaysian statutory tax modules (EPF, SOCSO) for SMEs.
- Developed **HR management system** with payroll calculation, leave management, and government regulatory reporting - deployed across multiple enterprise clients.
- Named **Top Web Developer - Southeast Asia 2019**.

Microsoft Research Center

2011 - 2014

Backend Developer · Banking & Compliance Modules

Technology Park Malaysia, Kuala Lumpur

- Developed and localized **banking compliance and tax modules** for the Malaysian market - integration with regional banking APIs and statutory reporting frameworks.
- Collaborated on backend infrastructure and deployment for Microsoft's regional research and commercial center.

SELECTED PROJECTS

Shahr-e-Aghsat - BNPL & Digital Lending Platform

LIVE · 100B+ IRR/yr

Full-ownership BNPL platform for digital goods - wallet system, credit scoring engine, loan origination, idempotent gateway integration (BehPardakht/Mellat Bank), and installment scheduler. 12 Porto SAP domain modules. Zero payment failures in 6 months of live operation.

Laravel 10 · Next.js 14 · MySQL · Redis · Docker · Porto Architecture

ZAR Accounting Platform - CCBI Malaysia

Enterprise · SME

Web-based accounting and payroll platform for Malaysian SMEs - financial reporting, multi-entity chart of accounts, Malaysian tax compliance (EPF, SOCSO), and HR payroll modules deployed across enterprise clients.

ASP.NET · SQL Server · Malaysian statutory compliance

IranSampler - Multi-tenant B2B SaaS Platform

SaaS · 50+ Clients

Multi-tenant survey and data collection SaaS - per-tenant data isolation, dynamic form builder with conditional logic, response analytics, and role-based access. Led 14-person engineering team end-to-end.

Laravel · Vue.js · MySQL · Multi-tenant architecture

AWS Enterprise Cloud Migrations - Southeast Asia

AWS · 25+ Apps

Migrated 25+ enterprise applications for 20+ organizations across Malaysia, Singapore, and Vietnam to AWS cloud - VPC, multi-AZ RDS, Auto Scaling, IAM, 99.9% SLA maintained throughout.

AWS EC2 · S3 · RDS · SQS · ElastiCache · Lambda · CloudFront · VPC

EDUCATION

M.Sc. Software Engineering - Staffordshire University, United Kingdom

2011 - 2013

GPA 17/20 · Thesis: Cloud-based distributed systems architecture

B.Sc. Computer Hardware Engineering - Azad University, Tehran

2005 - 2010

GPA 16/20

CERTIFICATIONS & RECOGNITION

Top Web Developer - Southeast Asia	Industry Award	2019
MSC-Status Company Certification (Cloud Computing Business Innovation)	Malaysia Government	2010
IELTS Band 7.0 - English Proficiency (C1+ Level)	British Council	-
Porto Architecture Practitioner - applied in 2 production fintech systems (Shahr-e-Aghsat · Sinapse)	Self-directed	2024

TECHNICAL SKILLS

Fintech & Payments: Payment Gateway Integration (BehPardakht · Mellat Bank) · Digital Wallet Systems · BNPL / Installment Modules · Credit Scoring Engine · Loan Origination · Transaction Reconciliation · Idempotent Payment Design · Fraud Detection Workflows

Backend: PHP 8.x · Laravel 10/11 · ASP.NET Core · Node.js · REST API · GraphQL · Porto SAP · Clean Architecture · SOLID · DDD

Frontend: React · Next.js 14 · Vue.js 3 · Nuxt.js · TypeScript · Tailwind CSS · HTML5 / CSS3

Databases: MySQL · PostgreSQL · Redis · Elasticsearch · MongoDB · Database Design & Query Optimization

Cloud & DevOps: AWS (EC2 · S3 · RDS · SQS · Lambda · ElastiCache · CloudFront · VPC · IAM) · Docker · Kubernetes · GitLab CI/CD · Nginx · OpenResty

Architecture: Microservices · Modular Monolith (Porto SAP) · Multi-tenant SaaS · Event-driven (Kafka · RabbitMQ) · Turborepo Monorepo

AI Dev Tools: Claude AI (Anthropic) · GitHub Copilot · Cursor IDE · Prompt Engineering

Languages: English - Professional C1+ (IELTS 7.0) · Persian / Farsi - Native · Malay - Conversational
