English: C1+ (IELTS 7.0)

PROFESSIONAL SUMMARY

Senior Fullstack Developer with 15+ years building scalable APIs, microservices systems, and fintech platforms in **Node.js, React.js, PHP/Laravel, and AWS**. Extended production Node.js/GraphQL APIs in real deployments (Twenty CRM: bulk import mutations, OpenResty reverse proxy, custom pipeline flows). Built Redis-queued async microservices and a 12-module BNPL platform now processing **100B+ IRR/year** in live transactions. Migrated 25+ enterprise applications to AWS at Amazon Web Services Singapore (99.9% SLA, 3 years). Deep experience in SQL (MySQL, PostgreSQL), MongoDB, Docker, and clean architecture patterns (Porto SAP, DDD). Proven remote delivery for US and Singapore clients. Ready for full async collaboration.

CORE COMPETENCIES

Node.js - REST APIs - GraphQL

React.js - Next.js 14

Microservices Architecture

MongoDB - SQL (MySQL/PostgreSQL)

Redis - Async Queue Workers

PHP 8.x - Laravel 10/11

AWS Cloud Infrastructure

Docker - Kubernetes - CI/CD

Porto Architecture - DDD - SOLID

Reusable Libraries - Framework Design

Low-Latency System Optimization

Payment Systems - BNPL - Wallets

Tech Lead - Teams up to 14

Remote Async Delivery

TECHNICAL SKILLS

Backend: Node.js, PHP 8.x, Laravel 10/11, REST API, GraphQL, ASP.NET Core, Porto Architecture, SOLID, DDD

Frontend: React.js, Next.js 14, Vue.js 3, Nuxt.js, TypeScript, Tailwind CSS, HTML5, CSS3

Databases: MySQL, PostgreSQL, MongoDB, Redis, Elasticsearch - design, query optimization, multi-tenant schemas

Cloud & DevOps: AWS (EC2, S3, RDS, SQS, Lambda, ElastiCache), Docker, Kubernetes, GitLab CI/CD, Nginx, OpenResty

Architecture: Microservices, Modular Monolith, SOA, Porto SAP, Turborepo Monorepo, Multi-tenant SaaS

Fintech: Payment gateway integration (BehPardakht/Mellat Bank), Wallet systems, BNPL/installment modules, loan engines

AI-Assisted Dev: Claude AI, GitHub Copilot, Cursor IDE - daily workflows for refactoring, code review, delivery velocity

Tools: Kafka, RabbitMQ, Keycloak SSO, Filament Admin, Zabbix, Jira, GitLab

WORK EXPERIENCE

Tandis Mandegar Pardis (Shahr-e-Aghsat) Apr 2024 - Apr 2025

Full-Stack Developer - Middle East

- Architected and shipped a **12-module BNPL platform** from scratch - wallet system, loan management, installment scheduler, BehPardakht/Mellat Bank gateway - now processing **100B+ IRR/year** in live transactions.
- Built **Redis-queued async microservices** for installment processing - reduced notification delivery latency from 30s to under 2s; zero message loss across 6 months live.
- Designed modular service architecture using **Porto SAP pattern** (Containers/Ship/Actions/Tasks/Repositories) - 12 independent containers with zero cross-module coupling violations.
- Stack: **Laravel 10 backend + Next.js 14 frontend**, MySQL, Redis, Docker, OpenResty, SSL.
- Implemented idempotent payment gateway integration with full error handling, webhook validation, and transaction reconciliation.

Sinapse Jan 2025 - Apr 2025

Back-End Developer - Middle East

- Re-architected backend of an AI-powered health platform using **Porto architecture** - converted legacy MVC codebase into isolated Containers (business logic) and Ship (framework core) for clean scalability.
- Restructured into Porto's Actions, Tasks, and Repositories layers - reduced coupling between business domains and improved parallel team development.

- Cut critical API response times through targeted query optimization, Redis caching, and service decomposition.
- Exposed structured API contracts for ML/AI team integration - designed clean boundaries between predictive features and core platform.
- Used LLM-assisted workflows (Claude AI, Copilot) to deliver full re-architecture under tight deadline.

Innoghte (Remote - USA)

Apr 2023 - Nov 2023

Senior PHP & React Developer - Remote

- Led end-to-end migration from WordPress to **Laravel + React** stack - rebuilt all e-learning features (course management, user progress, content delivery, subscriptions) with zero downtime.
- Rebuilt frontend from WordPress themes to a **React component library** - reusable, testable, composable UI architecture.
- Improved page load performance ~60% post-migration by eliminating WordPress overhead.
- Full remote async delivery for US client - English-only technical communication throughout.

Donya-e-Eqtesad Media Group

May 2023 - Apr 2024

.NET Developer - Middle East

- Reviewed and upgraded 7 core internal systems for a large financial media organization.
- Designed and built an internal news monitoring platform for real-time content aggregation across multiple sources.
- Improved system stability through code refactoring, infrastructure upgrades, and query optimization.

Amargaran Tafakkor Ideal (IranSampler)

Aug 2022 - May 2023

Team Lead & Senior Developer - Middle East

- Led development of IranSampler - a professional multi-tenant SaaS survey platform (comparable to Typeform/PorsLine).
- Architected **multi-tenant data model** with per-tenant schema isolation and dynamic form builder engine with conditional logic and branching.
- Managed a team of **up to 14 engineers** - code reviews, sprint planning, technical roadmap, junior mentoring.
- Stack: Laravel, Vue.js, MySQL, role-based access control, API layer for third-party integrations.

Amazon Web Services

Nov 2015 - Sep 2018

Senior Developer (Cloud Infrastructure) - Singapore

- Migrated **25+ enterprise applications** from on-premise to AWS across Southeast Asia (Singapore, Malaysia, Vietnam) - maintained **99.9% SLA** during live migration windows.
- Designed cloud security and resilience architectures: VPC segmentation, IAM least-privilege, multi-AZ RDS, Auto Scaling, CloudFront.
- Provided technical onboarding for **20+ client organizations** - adapted cloud architecture per each client's existing stack and compliance requirements.

Cloud Computing Business Innovation Sdn. Bhd.

2010 - 2019

Senior Software Developer & CEO (Co-Founder) - Malaysia

- Co-founded and led an **MSC-status IT company** with up to 14 engineers delivering enterprise software to government agencies, universities, and private enterprises.
- Built ZAR (web-based accounting for SMEs), HR management systems with Malaysian payroll compliance, and multi-tenant client portals.
- Named **Top Web Developer Southeast Asia 2019**.

OPEN SOURCE EXTENSIONS & NODE.JS PROJECTS

Twenty CRM - Node.js / GraphQL API Extension Node.js - Production

Extended the open-source Twenty CRM (Node.js + GraphQL + React, Salesforce alternative) with bulk lead import mutations, linked task creation, and custom pipeline flows. Configured **OpenResty reverse proxy with SSL** for production deployment. Full-stack Node.js + GraphQL API work in a real production environment.

Stack: Node.js, GraphQL, React, PostgreSQL, OpenResty, Docker

Umami Analytics - Multi-Tenant Extension Next.js - Production

Extended the open-source Umami Analytics platform (Next.js + PostgreSQL) with custom event tracking modules, multi-tenant dashboard support, and RTL layout. Deployed as self-hosted analytics backbone for BNPL and e-commerce platforms.

Stack: Next.js, PostgreSQL, Docker

Dub.co - Link Attribution Platform Next.js - Production

Self-hosted and extended Dub.co (Next.js + Prisma) for campaign tracking across e-commerce funnels. Integrated with platform analytics pipelines and customized link metadata for regional audience targeting.

Stack: Next.js, Prisma, PostgreSQL

EDUCATION

M.Sc. Software Engineering - Staffordshire University, UK	2011-2013
GPA: 17/20 Thesis: Cloud-based distributed systems architecture	
B.Sc. Computer Hardware Engineering - Azad University, Tehran	2005-2010
GPA: 16/20	

CERTIFICATIONS & ACHIEVEMENTS

IELTS Band 7.0 - English Proficiency	C1+
Porto Architecture Practitioner - Applied in 2 production systems (Sinapse, Shahr-e-Aghsat)	2024-25
Top Web Developer - Southeast Asia	2019
MSC-Status Company Certification - Cloud Computing Business Innovation, Malaysia	2012
