## PROFESSIONAL SUMMARY

Senior Frontend Engineer with 15+ years of experience building high-performance web applications for systems operating at scale - including a BNPL platform processing 100B+ IRR annually and enterprise AWS migrations covering 25+ applications across Southeast Asia. Expert in React, TypeScript, and Next.js with hands-on application of OOP, MVC, and MVVM patterns in production codebases. Strong CI/CD pipeline experience (GitLab), Agile/Scrum delivery, and a full-stack background that surfaces as architectural depth: performance tuning, database optimization, and API design that make the frontend faster. M.Sc. Software Engineering, Staffordshire University (UK). English: C1+ (IELTS 7.0).

## TECHNICAL SKILLS

|                    |                            |                      |                                    |                          |
|--------------------|----------------------------|----------------------|------------------------------------|--------------------------|
| React   Next.js 14 | TypeScript                 | HTML5   CSS3         | State Management (Redux   Context) | CI/CD Pipelines (GitLab) |
| OOP   MVC   MVVM   | Unit Testing & Testability | Agile   Scrum   JIRA | High-Load Web Systems              | Git & Version Control    |
| E-Commerce Domain  | REST APIs & GraphQL        |                      |                                    |                          |

## WORK EXPERIENCE

### Tandis Mandegar Pardis (Shahr-e-Aghsat)

Apr 2024 - Apr 2025

#### Full-Stack Developer - Frontend Lead | Middle East

- Built production **Next.js 14 frontend** for a high-traffic BNPL e-commerce platform - admin dashboard with real-time transaction reporting, concurrency-safe installment scheduler UI, and responsive checkout flows handling 100B+ IRR/year in live transactions.
- Applied **MVVM-style component architecture** across 12 modules: Views (React components), ViewModels (Context-managed state + reducers), Models (typed API contracts with TypeScript interfaces).
- Implemented **CI/CD pipeline** with GitLab for automated build, test, and deploy cycles - zero-downtime deployments to production on every release.
- Built unit-testable frontend modules by enforcing strict separation between UI rendering, state logic, and data access - Porto pattern applied across React and Laravel layers.
- Managed frontend delivery solo using **Agile sprint planning**, self-managed JIRA backlog, and weekly release cadence against product milestones.

### Innoghte (Remote - USA)

Apr 2023 - Nov 2023

#### Senior PHP & React Developer | Remote

- Led full **WordPress-to-React migration** - rebuilt all frontend from PHP templates to React component architecture with TypeScript, clean routing, and modular state management.
- Rebuilt course management UI, user progress tracking, and content delivery as React SPA components - Lighthouse performance improved ~60% by eliminating WordPress runtime overhead.
- Zero-downtime migration** delivered via phased feature-flag rollout; all features rebuilt with no user-facing disruption.

### Amargaran Tafakkor Ideal (IranSampler)

Aug 2022 - May 2023

#### Team Lead & Senior Developer | Middle East

- Led development of **IranSampler**, a B2B survey SaaS comparable to Typeform - Vue.js 3 frontend with dynamic form builder (drag-and-drop, conditional branching), multi-tenant dashboards, and real-time analytics.
- Ran code reviews, established component standards, and maintained technical roadmap - delivered with an engineering team across Agile sprints tracked in JIRA.
- Architected multi-tenant data model with per-tenant UI isolation, role-based access control, and CSV/Excel export - served 50+ enterprise clients on a single instance.

Sinapse

Jan 2025 - Apr 2025

Back-End Developer | Middle East

- Re-architected backend of an AI-powered health platform using Porto architecture - separated business logic into independently testable modules (Actions/Tasks/Repositories pattern), enabling parallel frontend development without coupling.
- Defined typed API contracts with the AI/ML team for predictive health features consumed by the React frontend.

Mosbat Sabz E-Commerce

Jul 2021 - Jul 2022

Senior Laravel & Vue.js Developer | Middle East

- Built full-stack e-commerce platform - Vue.js frontend with custom WooCommerce plugin hooks, REST API integrations, and optimized MySQL queries for high-volume product catalog and reporting.

Amazon Web Services

Nov 2015 - Sep 2018

Senior Developer (Cloud Infrastructure) | Singapore

- Migrated 25+ enterprise applications to AWS across Southeast Asia, maintaining 99.9% SLA - instilled production-grade thinking around performance, resilience, and system observability that applies directly to high-load web frontends.

Cloud Computing Business Innovation Sdn. Bhd.

2010 - 2019

Co-Founder & CEO | Malaysia

- Co-founded MSC-status IT company in Malaysia - led up to 14 engineers delivering enterprise web applications for government agencies and universities. Named Top Web Developer Southeast Asia 2019.

SELECTED PROJECTS

BNPL E-Commerce Platform - Shahr-e-Aghsat

LIVE | HIGH LOAD | 100B+ IRR/yr

End-to-end BNPL platform built solo: Next.js 14 frontend for admin dashboard and checkout, TypeScript throughout, Redis-queued installment notifications, CI/CD pipeline, zero payment failures over 6 months of production at scale. 12 independent modules with clean MVVM-style separation.

Next.js 14 | React | TypeScript | Redis | GitLab CI/CD | Laravel 10 | MySQL | Docker

IranSampler - Multi-Tenant Survey SaaS

50+ ENTERPRISE CLIENTS

Typeform-comparable B2B SaaS - dynamic form builder with conditional logic, real-time analytics dashboards, multi-tenant isolation, role-based access. Led 14-person engineering team; delivered across Agile sprints with JIRA tracking.

Vue.js 3 | Laravel | MySQL | multi-tenant architecture

Open Source Extensions (Umami | Twenty CRM | Dub.co)

PRODUCTION

Self-hosted and extended 3 open-source React/Next.js platforms: Umami Analytics (custom event tracking + multi-tenant dashboards), Twenty CRM (GraphQL API bulk import extensions), Dub.co (campaign attribution pipelines for e-commerce funnels).

Next.js | React | Node.js | GraphQL | PostgreSQL | Prisma

EDUCATION

M.Sc. in Software Engineering - Staffordshire University, UK

2011 - 2013

GPA: 17/20 | Thesis: Cloud-based distributed systems architecture

B.Sc. in Computer Hardware Engineering - Azad University, Tehran

2005 - 2010

CERTIFICATIONS & ACHIEVEMENTS

IELTS Band 7.0 (C1+) - English Proficiency

Porto Architecture Practitioner - Applied in 2 production systems (Sinapse, Shahr-e-Aghsat)

Top Web Developer - Southeast Asia

2019

MSC-Status Company Certification (Malaysia)
