PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 15+ years of progressive experience spanning Southeast Asia (Malaysia, Singapore, Vietnam) and the Middle East, delivering enterprise-grade web platforms, cloud infrastructure, and fin-tech systems. Expert in Laravel, PHP, and React/Next.js with a strong track record in architecture e-commerce, BNPL (Buy Now Pay Later), and loan management platforms processing over 100B IRR in annual transactions. Holds an M.Sc. in Software Engineering from Staffordshire University (UK). Adept at leading teams, applying Porto and Clean Architecture patterns. Proficient in AI-assisted development workflows — leveraging Claude AI (Anthropic) and other LLMs as expert coding partners to accelerate delivery, improve code quality, and solve complex architectural challenges.

TECHNICAL SKILLS

Backend	PHP 8.x · Laravel 10/11 · ASP.NET Core · Node.js · REST API · GraphQL · Porto Architecture · Clean Architecture · SOLID · DDD
Frontend	React · Next.js 14 · Vue.js 3 · Nuxt.js · TypeScript · Tailwind CSS · HTML5 · CSS3 · jQuery
Databases	MySQL · PostgreSQL · Redis · Elasticsearch · MongoDB · Database Design & Query Optimization
Cloud & DevOps	AWS (EC2, S3, RDS, Lambda) · Docker · Kubernetes · GitLab CI/CD · Linux · Nginx · OpenResty · SSL/TLS
CMS & E-Commerce	WordPress · WooCommerce · Plugin Development · Headless CMS · Medusa.js
Fintech	BehPardakht / Mellat Bank Payment Gateway · Wallet Systems · BNPL / Installment Modules · Loan Calculation Engines · JetVam · Kaman.io
AI-Assisted Dev	Claude AI (Anthropic) · GitHub Copilot · ChatGPT · Cursor IDE · Prompt Engineering · AI-augmented architecture & code review · Vibe Coding workflows
Tools & Workflow	Keycloak SSO · Filament Admin · Kafka · RabbitMQ · Zabbix · Jira · GitLab
Architecture	Microservices · Modular Monolith · SOA · Porto · Turborepo Monorepo · Multi-tenant SaaS

WORK EXPERIENCE

Back-End Developer

Jan 2026 – Apr 2026

Sinapse · Middle East

- ▶ Optimized and re-architected the backend infrastructure of an AI-powered health & preventive medicine platform using Porto (github.com/Mahmoudz/Porto) — a modern software architectural pattern separating code into Containers (business logic) and Ship (framework core), enabling clean scalability and team-level modularity.
- ▶ Restructured Laravel codebase into Porto's Actions, Tasks, and Repositories layers, significantly reducing coupling between business domains and improving testability.
- ▶ Reduced critical API response times and improved overall platform reliability through targeted query optimization, caching strategies, and service decomposition.
- ▶ Collaborated with AI/ML team to expose structured API contracts for predictive health features.
- ▶ Utilized Claude AI and LLM-assisted coding workflows to accelerate refactoring cycles and maintain high code quality under tight deadlines.

Full-Stack Developer

Apr 2025 – Apr 2026

Tandis Mandegar Pardis (Shahr-e-Aghsat Platform) · Middle East

- ▶ Architected and developed the Shahr-e-Aghsat e-commerce platform (shahr-aghsat.com), a BNPL/installment purchasing system for digital goods.
- ▶ Built wallet system, loan management module, and BehPardakht/Mellat Bank payment gateway integration handling 10B+ IRR in annual sales.
- ▶ Designed 12 platform modules including order management, user credit scoring, and installment scheduling using Laravel + Next.js stack.
- ▶ Implemented Porto architecture patterns to ensure clean separation of concerns across all service layers.

.NET Developer

May 2024 – Apr 2025

Donya-e-Eqtasad Media Group · Middle East

- ▶ Reviewed and updated 7 core internal systems for one of the region's largest financial media organizations.
- ▶ Designed and built an internal news monitoring platform to track real-time content across multiple sources.
- ▶ Improved system stability and performance through code refactoring and infrastructure upgrades.

Senior PHP & React Developer

Apr 2023 – Nov 2024

Innoghte (Remote – USA) · Remote

- ▶ Led full migration of innoghte.com from WordPress to a modern Laravel + React stack.
- ▶ Rebuilt all e-learning features including course management, user progress tracking, and content delivery.
- ▶ Improved site performance and SEO scores significantly post-migration.

Team Lead & Senior Developer

Aug 2023 – May 2024

Amargaran Tafakkor Ideal (IranSampler Platform) · Middle East

- ▶ Led development of IranSampler, a professional survey and questionnaire platform (comparable to PorsLine).
- ▶ Managed a development team, conducted code reviews, and defined technical roadmaps.
- ▶ Architected the platform's multi-tenant data model and dynamic form builder engine.

Senior Laravel & Vue.js Developer

Jul 2021 – Jul 2022

Mosbat Sabz E-Commerce · Middle East

- ▶ Delivered full-stack development using Laravel, Vue.js, PHP, and WordPress for an online pharmaceutical e-commerce platform.
- ▶ Built and customized complex WooCommerce plugins, theme hooks, and REST API integrations.
- ▶ Applied OOP principles, SOLID design, and clean code standards throughout development.

- ▶ Implemented advanced MySQL queries for reporting, database optimization, and WooCommerce data modeling.

Senior Developer (Cloud Infrastructure – Amazon)

Nov 2015 – Sep 2018

Amazon Web Services · Singapore

- ▶ Trained and migrated 25+ enterprise applications from on-premise to AWS cloud infrastructure.
- ▶ Provided cloud onboarding and technical guidance to 20+ active organizations across Southeast Asia.
- ▶ Designed and implemented cloud security, scalability, and resilience architectures on AWS.

Senior Software Developer & CEO

2010 – 2019

Cloud Computing Business Innovation Sdn. Bhd. · Malaysia

- ▶ Co-founded and led an MSC-status IT company in Malaysia with a team of up to 14 engineers.
- ▶ Delivered server infrastructure, network design, and web application development for government agencies, universities, and private enterprises.
- ▶ Developed ZAR, a web-based accounting application for SMEs, and an HR management system with Malaysian tax/payroll compliance.
- ▶ Built maid agency automation software and multi-tenant client portals.
- ▶ Technologies: .NET, ASP.NET, PHP, MySQL, Cloud Infrastructure.

.NET Developer

Jan 2015 – Jan 2019

CCBI Malaysia · Malaysia

- ▶ Developed intelligent business management and accounting software for enterprise clients.
- ▶ Built a QuickBooks-equivalent web-based accounting platform using .NET technologies.
- ▶ Designed HR management modules including payroll, leave, and performance tracking.

Backend Support & Troubleshooting Engineer

2011 – 2014

Microsoft Research Center · Technology Park, Malaysia

- ▶ Provided backend support and issue resolution at Microsoft's regional research and commercial center.
- ▶ Developed and localized software modules for the Malaysian market including banking and tax modules.
- ▶ Collaborated with cross-functional teams on infrastructure and deployment tasks.

EDUCATION

M.Sc. in Software Engineering

2011 – 2013

Staffordshire University · United Kingdom

- ▶ GPA: 17/20 · Thesis focused on cloud-based distributed systems architecture.

B.Sc. in Computer Hardware Engineering

2005 – 2010

Azad University (Tehran Center Branch) · Middle East

- ▶ GPA: 16/20

CERTIFICATIONS & ACHIEVEMENTS

- ▶ Top Web Developer – Southeast Asia (2019)
- ▶ PhD Candidate (2019) – Computer Science
- ▶ MSC-Status Company Certification – Malaysia (Cloud Computing Business Innovation)
- ▶ IELTS Band 7.0 – English Proficiency (C1+ Level)
- ▶ **Porto Architecture Practitioner** — Applied Porto SAP (by Mahmoud Zalt, github.com/Mahmoudz/Porto) in production Laravel systems at Sinapse and Shahr-e-Aghsat, implementing Containers/Ship separation, Actions, Tasks, and Repository layers.

KEY PROJECTS & PORTFOLIO

URL	Description
https://shahr-aghsat.com	BNPL / installment e-commerce platform · Laravel + Next.js · BehPardakht gateway · 10B+ IRR annual sales
https://iransampler.com	Professional survey & questionnaire SaaS (comparable to PorsLine) · Laravel · Vue.js
https://innoghte.com	E-learning platform (US-based) · WordPress → Laravel + React full migration
https://innoghte.ir	Regional mirror of Innoghte e-learning platform · Laravel · React
https://mosbatesabz.com	Online pharmacy e-commerce · WooCommerce · Laravel · Advanced MySQL · WordPress
https://mosbatesabz.com/mag	Content & magazine section of Mosbat Sabz · WordPress · SEO-optimized editorial
https://tehrangarden.com	TehranGarden — web development & design project · Web development & design
https://financialtribune.com	Financial Tribune — English-language Middle East financial news · .NET backend systems
https://events.donya-e-eqtesad.com/fa	Donya-e-Eqtesad Events Portal · Internal system development & news monitoring platform
https://ecoiran.com	Ecolran — regional economic news platform · Web development

OPEN SOURCE CONTRIBUTIONS & EXTENSIONS

Extended and deployed the following open-source platforms in production environments over the past two years, contributing custom modules, integrations, and architectural improvements beyond their original scope:

Project	What it is	Extensions & Contributions
Umami Analytics github.com/umami-software/umami	Privacy-focused open-source analytics platform (Google Analytics alternative) · Next.js · PostgreSQL	Extended with custom event tracking modules, multi-tenant dashboard support, and RTL layout support. Integrated with e-commerce and BNPL platforms as a self-hosted analytics backbone.
Twenty CRM github.com/twentyhq/twenty	Open-source CRM — AI-ready alternative to Salesforce · Node.js · GraphQL · React	Deployed self-hosted instance with hybrid native + Docker setup. Extended GraphQL API for bulk lead imports with linked task creation. Configured OpenResty reverse proxy with SSL. Built custom lead pipeline flows.
Dub.co github.com/dubinc/dub	Modern open-source link attribution & short-link platform · Next.js · Prisma	Self-hosted and extended for campaign tracking across e-commerce and marketing funnels. Integrated with platform analytics pipelines and customized link metadata for regional audience targeting.
